WORK EXPERIENCE

Technical Engineer

Assist Digital - Converneo GmbH

08/2024 - Present

Belgrade, Serbia

Infrastructure Monitoring and Software Developing

Responsibilities

- Enhanced and maintained company application, implementing custom features, bug fixes, and managing application setup.
- Conducted testing and validating web application API to identify functional and security flaws before deployment.
- Participated in internal vulnerability management efforts, assessing risks, prioritizing remediation, and ensuring compliance with organizational security standards.
- Consulted in customer meetings, assessing feasibility and relevance of suggested web app upgrades with project managers.
- Proactively monitored company infrastructure for vulnerabilities, managing customer servers and services deployed on Cloud for performance and uptime.
- Implemented automation solutions to replace manual operational tasks.

Software Support Engineer - Professional Services

NCR Corporation

11/2023 - 08/2024

Belgrade, Serbia

Responsibilities

- Monitored and optimized application performance on diverse platforms (Desktop, Web and Mobile).
- Oversaw end-to-end application process flows and proactively identified potential performance and security issues on the server.
- Worked with the development team, contributing to maintain and upgrade the application source code to meet client change requests.
- Collaborated in the development of application security policies, ensuring robust source code protection against emerging threats.
- Engaged in application upgrades, emphasizing continuous improvement and adherence to security best practices.

Technical Service Desk Specialist - RBI

NCR Corporation

02/2022 - 11/2023

Belgrade, Serbia

Network, Hardware and Software support

Responsibilities

- Supported clients in maintaining and troubleshooting enterprise network, specializing in Cisco switches, firewalls, routers, and VMware SD-WAN.
- Collaborated with network technicians on optimal network design for secure and efficient connectivity in enterprise offices.
- Proficiently logged and tracked client requests in the ticketing system, meeting company-defined SLAs and ensuring case resolution with team.
- Oversaw corporate enterprise accounts, applications and workstations to proactively identify security vulnerabilities.
- Prioritized and resolved technical issues, ensuring SLA adherence.
