WORK EXPERIENCE

Technical Engineer

Assist Digital - Converneo GmbH

08/2024 - Present

Belgrade, Serbia

Infrastructure Design, Automation and Monitoring

Responsibilities

- Enhanced and maintained company services, implementing custom features, bug fixes, and managing application setup.
- Managed enterprise identity and access using Keycloak & Google IAM, configuring SAML and OAuth applications, group-based access policies, and SSO integrations for third-party and internal services.
- Handled vulnerability management, including risk assessment, remediation prioritization, regular server maintenance and patching to maintain compliance.
- Consulted in customer meetings, assessing feasibility and relevance of suggested infrastructure upgrades with project managers.
- Implemented infrastructure and operational automation using IaC Terraform/OpenTofu, Ansible. Replacing manual processes with reproducible, version-controlled workflows.

Software Support Engineer - Professional Services

NCR Corporation

11/2023 - 08/2024

Belgrade, Serbia

Responsibilities

- Monitored and optimized application performance on diverse platforms (Desktop, Web and Mobile).
- Oversaw end-to-end application process flows and proactively identified potential performance, data and security issues on the server.
- Worked with the development team, contributing to maintain and upgrade the application source code to meet client change requests.
- Collaborated in the development of application security policies, ensuring robust source code protection against emerging threats.
- Engaged in application upgrades, emphasizing continuous improvement and adherence to security best practices.

Technical Service Desk Specialist - RBI

NCR Corporation

02/2022 - 11/2023

Belgrade, Serbia

Network, Hardware and Software support

Responsibilities

- Supported clients in maintaining and troubleshooting enterprise network, specializing in Cisco switches, firewalls, routers, and VMware SD-WAN.
- Collaborated with network technicians on optimal network design for secure and efficient connectivity in enterprise offices.
- Proficiently logged and tracked client requests in the ticketing system, meeting company-defined SLAs and ensuring case resolution with team.
- Oversaw corporate enterprise accounts, applications and workstations to proactively identify security vulnerabilities.
- Prioritized and resolved technical issues, ensuring SLA adherence.

EDUCATION & COURSES

Cyber Security SOC Analyst - Oktacron.rs - Poslovna Savrsenost (09/2023 - 12/2023)

- Completed cybersecurity course with hands-on experience in SOC operations, malware forensics, cryptography, penetration testing, and AD attacks.

Java Development - Poslovna Savrsenost (2021)

- Developed Java back-end and web applications using Spring Boot, Hibernate, Thymeleaf, and Maven; with JUnit and Mockito testing.

Visoka Skola Elektrotehnike i Racunarstva - Electronics and Communication - Bachelor Studies (2017)

PROJECTS

Implementation of High-Availability IAM Infrastructure (Keycloak) (02/2026 - 04/2026)

Led implementation of a high-availability IAM system (Keycloak) with SSO and RBAC across internal and third-party applications, supporting NIS-2 Directive compliance, using Docker, Terraform, HAProxy, etcd, and Patroni.

Grafana-Based Observability Platform Implementation (11/2024 - 05/2025)

Integrated Grafana with databases and infrastructure, designing dashboards and alerting for real-time system visibility and incident response.
